Base Packaging

Specialist in (waste) bags

Base Packaging: Your One-Stop Partner for High-Quality (Waste) Bags and Sustainable Solutions!

As specialists in waste management and packaging, we are committed to providing you with the best products and expert advice. Whether you're looking for bin liners, pedal bin liners, skip liners, compostable bags, Bio-Base(d)® bags or BRC-certified food-safe bags, we have it all available under our Premium Gold Label®.

Our commitment to quality, backed by a team of experienced specialists, enables us to deliver a wide range of bags quickly from stock. At Base Packaging, it's all about you, our valued customer. Together, we can strive for a cleaner, more organised and sustainable future. Discover today how our solutions can support and optimise your business!

Customised solutions

Are you looking for specific solutions for your waste stream? In addition to our standard range, we offer a variety of customised options for waste bags to optimise your waste management. With our extensive network and our team's specialist knowledge, we'd be happy to help you develop the perfect waste bag.

At Base Packaging, we go the extra mile to make your wishes a reality. We understand that every organisation has unique needs and we strive to meet those needs. Do you want your bags to perfectly match your personal style and image? That's possible! We offer a range of colour options and the option to have your own logo printed on them. This allows you to add a personal touch and make your bags truly your own.

Best Packaging Group

By working together, we are stronger and can achieve shared growth. That is why we are part of the Best Packaging Group (BPG Group), a partnership of specialist companies in the packaging sector. This collaboration enables us to draw on each other's expertise and resources, so that we can offer you a comprehensive packaging solution and take the hassle out of various packaging challenges.

The organisations that form part of the Best Packaging Group are:

- Argos Packaging & Protection
- Monsterbox
- EBC Golfkarton
- Base Packaging

Our brands

Discover a range of Premium Gold brands that meet the most demanding business needs. Our commitment to quality, craftsmanship and innovation is evident in every brand, ensuring that each one excels. Whatever your business requirements, our range of these distinctive Premium Gold brands offers the perfect solution.

100% Compostable Bags

The 100% compostable Premium Gold Label bags, made from high-quality PLA material, are perfect for sustainable businesses looking for an environmentally friendly solution for kitchen and garden waste. They support a circular economy and help create a greener future with Premium Gold Label Compostable® bags.

Prime Recycled

Certified Prime Recycled bags are made from high-quality PCR/PIR material and form a sustainable, environmentally friendly 'cycle'. The recycled material from Prime PE bags is reused to produce these bags, enabling them to contribute to a circular economy. Make a conscious choice for sustainability and help reduce waste with our innovative, circular bags.

Prime PE-Bags

These bin liners are made from 100% HDPE for excellent quality and optimal recyclability. As part of the Premium Gold Label range, they offer a superior solution for waste disposal. Their exceptional quality not only promotes effective recycling but also supports sustainable recycling practices. Choose these certified PE bin liners and ensure high-quality performance and an environmentally friendly future.

Food Save BRC-IOP PE-Bags

Our Premium Gold Label – Food Save BRC bags are certified to the BRC-IOP standards for maximum food safety. These high-quality bags not only offer reliable food packaging solutions, but also promote sustainability through the use of fully recyclable material. Make a conscious choice for food safety and a greener future with our innovative Premium Gold Label – Food Save BRC bags.

Bio Base(d)®

Bio-Base(d) is now available! These bin liners are indispensable in everyday (business) life if sustainable and environmentally friendly business practices are important to your company.

BIO BASE(D)®
WE HARVEST CO²
FOR A CLEANER WORLD

Are sustainability and environmentally friendly business practices essential to your organisation? Then discover our range of Bio-Base(d) bin liners. These liners are now indispensable in day-to-day business operations and offer a sustainable solution.

Our Bio-Base(d) bin liners are made from no less than 75% sugar cane. Using this raw material not only reduces CO_2 emissions but also results in CO_2 absorption equivalent to 1.3 times the weight of the bag. The waste product from the sugar cane plant is reused for other products after processing. Over its lifetime, the sugarcane plant absorbs more CO_2 than is emitted during the production and transport of the Bio-Base(d) bin liners.

"To supply the whole world with green, flexible PE, only 1 per cent of the world's agricultural land is needed."

Until now, only two types of bin liners were available:

- Polyethylene (PE) bin liners (made from petroleum)
- Biodegradable bin liners (made from starch)

Our Bio-Base(d) bin liners are produced from green PE. Unlike some compostable bags that require specially produced starch, our bags use waste from the sugarcane plant. During the production process, two washings are carried out to extract cane sugar, and the green PE is obtained from the third and final washing stage.

With the Bio-Base(d) bin liners, we bridge the gap between biodegradable bags and traditional PE bags. This makes our bags the most environmentally friendly choice on the market. Furthermore, this offers prospects for the future, as only 1 per cent of the world's agricultural land is needed to supply the global demand for green flexible PE.

OK biobased | TÜV AUSTRIA 60 - 79 % S2860

Bio-based bin liners offer significant environmental benefits:

- No CO_2-emissions, but CO_2-absorption
- Renewable raw material that is not subject to depletion
- Fully recyclable
- Retains the same strength as standard plastics
- Certified to international standards (TÜV / ISO / OK BioBased)

CO_2 calculator

The CO_2 calculator shows you and your customers exactly how much CO_2 is emitted, based on dimensions, thickness and the number of items/ annual consumption. This question is answered straight away; the CO_2 calculator's result immediately shows you your current CO_2 emissions and the CO_2 savings you achieve by using our Bio-Base(d)® bags.

**The outcome of the CO_2 calculator is indicative. Actual CO_2 emissions depend on various, such as transparation, loading and transshipment, and the type of raw materials used.*

Our product assortment

Our extensive range of bags is designed to meet all your packaging and storage needs, whilst maintaining the highest standards of sustainability and safety. We offer a wide range of options, including bio-based compostable LDPE and HDPE bags, food-safe crate bags, drawstring bags, container bags, rubble bags, collection bags and bio bags.

Bio-Base(d)® bags

Bio-based bin liners are made from green PE. Unlike some compostable bags, which are made from specially produced starch, these bags are made from sugarcane waste. Throughout its life cycle, the sugarcane plant absorbs CO_2 from the air, which serves as a source of nourishment for the plant. It absorbs so much CO_2 that it has a positive impact on our environment. Our Premium Gold Label (Bio-Based) bags are TÜV-certified.

Art. no.	Dimensions (W x L)	Quality	Colour	Packaging	Quantity per pallet
B564618002	61 x 80 cm	T23/HDPE	White	25 rolls of 20 pieces each per box	32.000 pc.

B564701172	70 x 110 cm	T70/LDPE	Blue	10 rolls of 20 pieces each per box	8.000 pc.

Bio-compostable bags

These bin liners are made from maize starch, making them a highly organic product. They are available in various sizes to fit all types of bins. Thanks to their leak-proof design, they prevent unpleasant odours and the build-up of maggots, particularly in warm weather. Furthermore, the bin liners are exceptionally strong, which significantly reduces the risk of tearing. Our Premium Gold Label compostable bin liners are TÜV OK home & OK Industrial certified.

HDPE bags

PGL HDPE (High-Density Polyethylene) bags are sturdy, versatile plastic bags used in a wide range of applications. The material is strong and resistant to tearing, chemicals and moisture, whilst remaining lightweight. Furthermore, HDPE is recyclable, which contributes to its popularity at a time when sustainability is becoming increasingly important.

LDPE bags

PGL LDPE (Low-Density Polyethylene) is a flexible, soft plastic that is often used for plastic bags, cling film and squeeze bottles. Due to its lower density, it is more pliable and less rigid than HDPE. It is resistant to moisture and chemicals, making it ideal for food packaging. Although recyclable, LDPE is recycled less frequently due to the difficulty of the process.

INCO collection bags / Incontinence bags

PGL Incontinence Bags, widely used in care homes and nurseries, offer a hygienic way to dispose of incontinence products such as nappies. They are made from sturdy HDPE material that prevents odours and tearing, even when the bag is full. Thanks to their clever design, the bags can be easily sealed without the need for adhesive strips or elastic bands.
